PHARMACEUTICAL CONTRACT MANUFACTURING OPERATIONS

More than 100 years committed to Health Service

Lab. Sella Farmaceutici is an Italian company that since 1920 is guided by his founder's family and operates nationally and internationally.
More precisely, it produces and distributes more than 100 Sella branded products (pharmaceutical products, medical devices, supplements and cosmetics) in Italy and in more than 10 countries worldwide.
It exclusively distributes leading US and Spanish products in the domestic market.

Finally, Sella is a strategical partner of Development and Production for relevant national and multinational pharmaceutical companies.

Our products

- are developed to provide effective and safe solutions to people's well-being and health needs;
- are self-medication products (OTC medicines not subject to prescription, medical devices, food supplements and cosmetics);
- are manufactured in compliance with the highest pharmaceutical quality standards.

A global partner in development and contract manufacturing

Sella joined Progetto Benessere at the end of 2023, to enhance investments in quality, innovation and technology, to become a leader in CDMO of health care products.

In recent years, the company has focused on increasing its production capability, GMP certified, of medicines and medical devices.

Together with the other companies of the Group, our goal is to establish itself as a leading CDMO, becoming a trusted partner in Italian and global markets for the production of drugs, medical devices, food supplements and cosmetics, offering a full-service approach from formulation and development to production's scale up and industrialization, thanks to state of the art technologies.

Main historical steps. More than 100 years committed to health services

1920

History of Lab. Sella Farmaceutici starts in 1920 in Schio, in a small laboratory incorporated with Dr. Antonio Sella's pharmacy
